MOHAMMED K. ALI is Associate Professor in the Hubert Department of Global Health and Department of Epidemiology, and a primary care physician. He is trained in medicine (from the University of Cape Town), global health and cardiovascular medicine (from the University of Oxford as a Rhodes Scholar), and business and management (from Emory University).

His areas of interest include the application of epidemiology and implementation science as they relate to diabetes, cardiovascular health, and health services improvement. He co-directs a NIDDK-funded Center for Diabetes Translation Research and serves as a scientific advisor for the Division of Diabetes Translation at the US Centers for Disease Control and Prevention.

He was a member of the Committee on Improving the Quality of Health Care Globally for the National Academies of Sciences, Engineering, and Medicine.
